# List of Figures

|     |   |    |
|-----|---|----|
| 1.1 | A schematic diagram of the major stages of star and planet formation . . . . .  | 4  |
| 1.2 | Observational classes identified via spectral energy distributions . . . . .  | 5  |
| 1.3 | Spectral Energy Distributions of a classical circumstellar disk and several types of evolved disks . . . . .  | 6  |
| 2.1 | Excerpts of the NIRSPEC spectra of TW Hya and GM Aur . . . . .  | 16 |
| 2.2 | Rotation diagrams for TW Hya and GM Aur . . . . .   | 17 |
| 3.1 | $30/13 \mu\text{m}$ flux ratios and distance-normalized 1.3 mm fluxes for the disks in our sample, as well as for four canonical debris disks . . . . . | 48 |
| 3.2 | Spectra of the fourteen transitional disks in our sample, plus one of our photospheric standards, in the 1st M-band order . . . . .                     | 49 |
| 3.3 | A close-up of CO lines longward of P(25) . . . . .  | 50 |
| 3.4 | A histogram showing the numbers of disks with CO and Pf $\beta$ detections, neither CO nor Pf $\beta$ detected, or Pf $\beta$ but no CO . . . . .       | 51 |
| 3.5 | A comparison between CO line flux and M-band continuum excess . . . . .   | 52 |
| 3.6 | Comparison of veiling-derived excess flux and that derived from both photometry and stellar models . . . . .  | 53 |
| 3.7 | Excess fluxes and disk models for LkCa 15, GM Aur, and TW Hya . . . . .   | 54 |
| 3.8 | Pf $\beta$ equivalent width compared to accretion rate, equivalent width of the CO v=1 → 0 P(6) line, and H $\alpha$ equivalent width . . . . .         | 55 |
| 3.9 | CO emission line composites . . . . .   | 56 |

|      |   |     |
|------|---|-----|
| 3.10 | A comparison of several relevant disk radii: $R_{\text{corot}}$ , $R_{\text{sub}}$ , $R_{\text{dust}}$ , $R_{\text{CO}}$ , $R_{\text{SA}}$ , and $R_{\text{trans}}$ | 57  |
| 3.11 | Rotation diagrams for the CO emission sources   | 58  |
| 3.12 | $\chi^2$ plots of temperature and column density in our rotation diagram fits   | 59  |
| 3.13 | $M_{\text{disk}}$ against $N_{\text{CO}}$   | 60  |
| 3.14 | $\dot{M}$ against $N$ —the gas column density   | 61  |
| 4.1  | NIRSPEC spectra of T Tauri star DR Tau and Herbig Ae star AB Aur  | 88  |
| 4.2  | Composite emission lines, with one- or two-Gaussian fits  | 89  |
| 4.3  | Composite emission lines for sources in which only one of the M-band orders was observed with CO $v=1 \rightarrow 0$ emission                                       | 90  |
| 4.4  | CO inner radius against corotation radius   | 91  |
| 4.5  | CO inner radius against luminosity  | 92  |
| 4.6  | CO inner radius against dust inner radius   | 93  |
| 4.7  | Relationships between all relevant disk radii: the disk corotation radius, the dust sublimation radius, the dust inner radius and the CO inner radius               | 94  |
| 4.8  | $R_{\text{CO}}/R_{\text{sub}}$ against $L_{\text{acc}}/L_{\star}$   | 95  |
| 5.1  | Spitzer-IRS spectra of DR Tau and AS 205 A  | 107 |
| 5.2  | NIRSPEC L-band spectra of DR Tau and AS 205 A   | 108 |
| 5.3  | NIRSPEC CO emission spectra and rotation diagrams for DR Tau and AS 205 A   | 109 |
| 6.1  | Continuum determination for two disks   | 125 |
| 6.2  | Data, best-fit molecular models, and residuals  | 126 |
| 6.3  | Spectra for a varied sample of disks  | 127 |
| 6.4  | Detections and non-detections as a function of S/N  | 128 |
| 6.5  | Detection fractions as a function of spectral type  | 129 |
| 6.6  | Detections and non-detections of H <sub>2</sub> O and [Ne II] on a color-color diagram  | 130 |
| 6.7  | [Ne II] equivalent width versus $n_{13-30}$ color   | 131 |
| 6.8  | Histogram of H <sub>2</sub> O and OH model-fit parameters   | 132 |

|      |  |     |
|------|--|-----|
| 6.9  | Correlations between H <sub>2</sub> O model-fit parameters . . . . .   | 133 |
| 6.10 | Molecular ratios from this work, compared to previous results and other environments . . . . .                 | 134 |
| 6.11 | Sample model results for CO <sub>2</sub> and C <sub>2</sub> H <sub>2</sub> . . . . .                           | 135 |
| 7.1  | Spectra for a sample of circumstellar disks, and a photospheric standard star, in the L- and M-bands . . . . . | 155 |
| 7.2  | NIRSPEC spectrum of a circumstellar disk showing evidence for H <sub>2</sub> O, OH, and HCN .                  | 156 |
| 7.3  | Accretion luminosity plotted against Pf $\beta$ line luminosity. . . . .                                       | 157 |

# List of Tables

|     |   |     |
|-----|---|-----|
| 2.1 | Line Fluxes . . . . .   | 18  |
| 3.1 | Summary of Observations . . . . .                             | 62  |
| 3.2 | Our Sample: Stellar and Disk Properties . . . . .             | 63  |
| 3.3 | Summary of SED Fitting: Results from the Literature . . . . . | 64  |
| 3.4 | Veiling Results . . . . .                                     | 65  |
| 3.5 | H I Recombination Equivalent Widths . . . . .                 | 66  |
| 3.6 | CO Inner Radii . . . . .                                      | 67  |
