

Appendix C

Plasmid Insert Sequences for pGL2-VEGF-*Luc* and pCSJ-FLT1 Plasmids

Plasmid Insert Sequences for Quantitative DNase I Titration Footprint Analysis

Plasmid Information for pGL2-VEGF-*Luc*, which was used for DNase I footprint titration K_a measurements of HRE polyamides in Chapters 2 and 3. This plasmid was a kind gift from the Kaelin group, who graciously provided the plasmid and plasmid insert sequence.

pGL2-VEGF-*Luc*: Contains WT VEGF HRE Sequence (bold), 197 bp sequence
