I must first thank my advisor, Dr. Eric Davidson. It was a difficult, long, and windy road, but one worth traveling.

I would like to thank my committee members, Dr. Marianne Bronner-Fraser, Dr. Scott Fraser and Dr. Kai Zinn, for their continued support and much encouragement.

All members of the Davidson Lab past and present have had some input into the development of this work and myself.

I must specially thank Dr. Chiou-Hwa Yuh (Cathy), as she was instrumental in helping me from the very beginning to the very end of this project.

Also, special thanks to Dr. Andrew Ransick, Dr. Jonathan Rast, and Dr. Veronica Hinman for much guidance during this process.

To Titus Brown for introducing me to dark humor, but specially for releasing Family Relations.

To Dr. Hamid Bolouri, members of the Bolouri Lab past and present, and William Longabaugh in particular for providing us with very user-friendly open source software packages designed specifically with our lab users in mind.
