

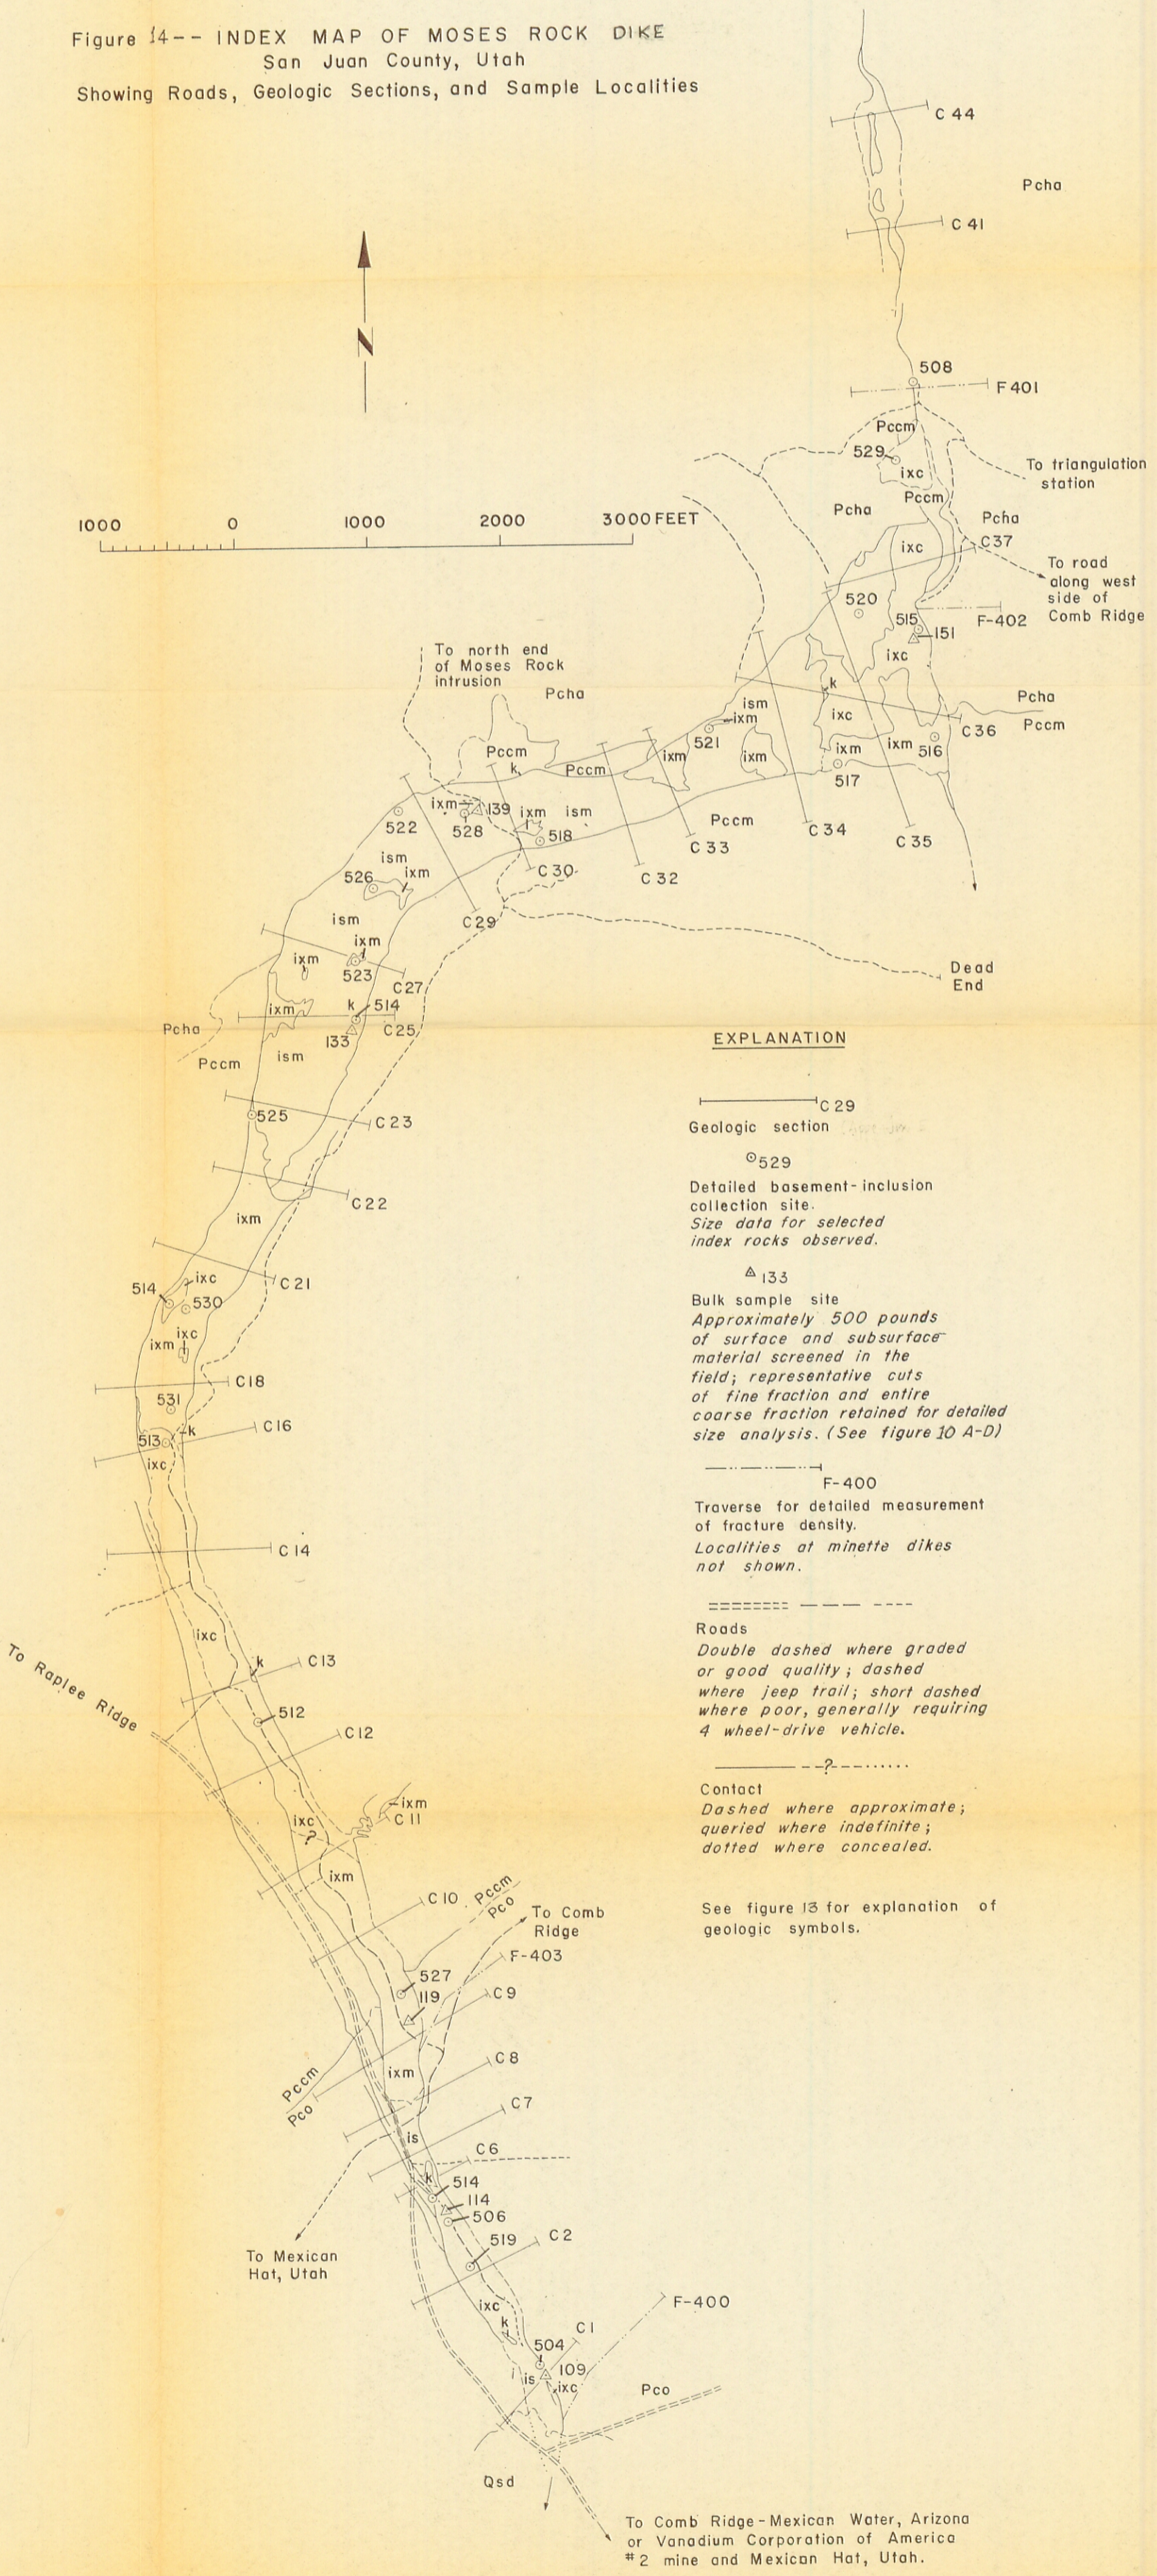

Figure 14-- INDEX MAP OF MOSES ROCK DIKE
San Juan County, Utah
Showing Roads, Geologic Sections, and Sample Localities

EXPLANATION

— C 29
Geologic section

○ 529
Detailed basement-inclusion collection site.
Size data for selected index rocks observed.

△ 133
Bulk sample site
Approximately 500 pounds of surface and subsurface material screened in the field; representative cuts of fine fraction and entire coarse fraction retained for detailed size analysis. (See figure 10 A-D)

— F-400
Traverse for detailed measurement of fracture density.
Localities at minette dikes not shown.

— — — — —
Roads
Double dashed where graded or good quality; dashed where jeep trail; short dashed where poor, generally requiring 4 wheel-drive vehicle.

— ? — — — — —
Contact
Dashed where approximate; queried where indefinite; dotted where concealed.

See figure 13 for explanation of geologic symbols.
