

Instructions for printing out subsequent pdf files for the document:

Niemi, Nathan A., 2002, Extensional tectonics in the Basin and Range province and the geology of the Grapevine Mountains, Death Valley region, California and Nevada [Ph.D. dissert.]: California Institute of Technology, Pasadena, 356 p.

Five files are available for downloaded from this site, although only two files are necessary for a complete copy of this thesis.

The files Niemi_2002_simplex.pdf and Niemi_2002_duplex.pdf contain the complete text of the thesis. The simplex version of the file is designed for printing to a regular laser printer, the duplex version is designed for printing on a printer capable of two-sided printing.

This thesis contains 5 color figures. These figures ARE included in the above files. However, for ease of printing, the color figures have also been included in the files Niemi_2002_simplex_color.pdf, which contains the five color figures in a layout for single sided printing, and Niemi_2002_duplex_color.pdf, which contains both the color figures and the text (or black and white figure) on the reverse side of the figure for easy two-sided printing.

The file Niemi_2002_oversize_plate.pdf contains a 1:48,000 scale geologic map of the Grapevine Mountains, in Death Valley, California and Nevada, in PDF format. The size of the map sheet is 36" wide and 42" long, and is designed for plotting on a large format printer.
