

EXPLANATION

- Aplite and fine-grained granite
- Limestone, recrystallized and locally silicated
- Pyroxene-rich granulite
- Tactite
(chiefly "ribbon rock" except in Upper Talus body, where massive tactite predominates)
- Strike and dip of bedding
- Strike and dip of primary flow-layering in igneous rocks
- Exploratory trench

0 10 20 50
Scale in feet
Contour interval: 10 feet
Datum is mean sea level
