

## List of Tables

|     |   |     |
|-----|---|-----|
| 2.1 | NEHRP and associated binary site classification . . . . .   | 32  |
| 2.2 | RMS horizontal acceleration (rock sites) envelope attenuation relationship: iterations 1 and 2 . . . . .  | 54  |
| 3.1 | Regression coefficients for Eqn. 2.3 for S-wave envelope amplitude parameters for acceleration, velocity, and filtered displacement on rock and soil sites. . . . . | 57  |
| 3.2 | Effective magnitude scaling of acceleration, velocity, and displacement at close distances to large earthquakes . . . . .   | 73  |
| 3.3 | Regression coefficients for Eqn. 2.3 for S-wave envelope amplitude parameters for acceleration, velocity, and filtered displacement on rock and soil sites. . . . . | 88  |
| 3.4 | Effective magnitude scaling of horizontal and vertical acceleration, velocity, and displacement at close distances to large earthquakes . . . .                     | 90  |
| 3.5 | Average V/H ratio for rock and soil sites for acceleration, velocity, and displacement . . . . .  | 93  |
| 3.6 | P-wave envelope amplitude attenuation relationships for rms horizontal and vertical acceleration, velocity, and displacement on rock and soil sites . . . . .       | 107 |
| 4.1 | Group definitions for linear discriminant analysis of P-wave amplitudes as magnitude estimators . . . . .   | 138 |
| 4.2 | Confusion matrix for linear discriminant analysis of P-wave amplitudes as magnitude estimators . . . . .  | 143 |
| 4.3 | Least squares estimates for unknowns in Eqn. 4.33 . . . . .   | 148 |
| 4.4 | Confusion matrix for linear discriminant analysis of P-wave $\log(acc)$ and $\log(displ)$ as magnitude estimators . . . . .   | 152 |

|     |  |     |
|-----|--|-----|
| 4.5 | Confusion matrix for linear discriminant analysis of P-wave $\log(acc)$ and $\log(disp)$ as magnitude estimators . . . . .           | 152 |
| 5.1 | Some stations within 100 km of the $M = 7.1$ Hector Mine mainshock   | 183 |
| 6.1 | Stations surrounding the epicenter of the 2003 $M=6.5$ San Simeon mainshock . . . . .  | 214 |
| 7.1 | Some stations within 150 km of the 2004 $M=6.0$ Parkfield mainshock  | 248 |
| 8.1 | Some stations within 30 km of the $M = 4.75$ Yorba Linda mainshock   | 275 |
| 9.1 | Cost table . . . . .   | 304 |
| 9.2 | Cost table in terms of $C_{ratio}$ . . . . .   | 305 |
| C.1 | RMS horizontal acceleration envelope attenuation relationships . . . . .   | 342 |
| C.2 | RMS horizontal velocity envelope attenuation relationships . . . . .   | 343 |
| C.3 | RMS horizontal displacement envelope attenuation relationships . . . . .   | 344 |
| C.4 | Vertical acceleration envelope relationships . . . . .   | 345 |
| C.5 | Vertical velocity envelope relationships . . . . .   | 346 |
| C.6 | Vertical displacement envelope relationships . . . . .   | 347 |
| E.1 | Confusion matrix for P/S discriminant using vertical and horizontal ground motion acceleration . . . . .                             | 354 |
| E.2 | Confusion matrix for P/S discriminant using vertical and horizontal ground motion velocity . . . . .                                 | 355 |
| E.3 | Confusion matrix for P/S discriminant using vertical and horizontal ground motion acceleration and velocity . . . . .                | 356 |
| E.4 | Confusion matrix for P/S discriminant using vertical and horizontal ground motion acceleration, velocity, and displacement . . . . . | 359 |
| F.1 | Confusion matrix for linear discriminant analysis of vertical S-wave amplitudes as magnitude indicators . . . . .                    | 366 |
