Notes:

- * dates and times are given in local time: UTC +7;
 timestamps embedded within the digital files of these photos are 1 hour ahead;
 the correct acquisition times are listed in this table
- (1) tape measure reads zero at water level at time of photograph
- (2) tape measure reads zero at the highest living coral (post-2004 HLS) as of 5 Feb 2005
- (3) pre-uplift HLS is 33-34 cm higher than post-uplift HLS
- (4) pre-uplift HLS is 40-41 cm higher than water level in this photo
- (5) post-uplift HLS is 6-8 cm higher than water level in this photo
