

List of Tables

5.1	Results using attentional selection and random patches.	48
5.2	Results for recognizing two objects that were learned from one image.	53
6.1	Single frame analysis results.	71
6.2	Results from processing four quantitative video transects.	72
7.1	Stimulus probabilities depending on task.	82
7.2	3-way analysis of variance with interactions for mixing cost.	85
7.3	4-way analysis of variance with interactions for switch cost.	85
A.1	Color opponency values for several colors.	99
A.2	Parameters of the distribution of skin hue in (r', g') color space.	104
